

The solution under extreme pollution: Sedicoat[®], the RTV coated glass insulator by Sediver

Does extreme pollution force you to wash your insulators?

By reducing the risk of flashovers caused by critical pollution accumulation in coastal, industrial or desert areas, Sedicoat[®] is the solution that eliminates the need for washing.

Sedicoat[®] is the technical solution developed by Sediver for extreme pollution, and combines:

- The Sediver glass insulator
- A qualified RTV coating
- A customized industrial process

Sedicoat[®] combined advantages

Sediver glass

- Fail-safe inspection
- Long-term reliability
- No aging
- Safe live-line working

+

Qualified RTV coating

- Hydrophobicity reduces surface leakage current
- Eliminates pollution related flashover

=

Improved pollution performance
No more washing

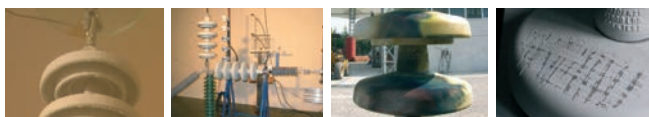

Sedicoat[®] high-performance

Optimum life time performance

- Stringent technical specifications
- Industrial process quality control
- Extensive qualification program

20 years of proven in-service performance

- 20 years of experience on line
- 1.5 million insulators in service
- 17 countries including USA & Canada
- Pollution types:
 - Marine pollution
 - Extreme industrial pollution
 - Desert conditions

Sedicoat[®], Wash-free technology
