

The solution under extreme pollution: Sedicoat[®], the RTV coated glass insulator

Does extreme pollution force you
to wash your insulators?

By reducing the risk of flashovers caused by critical pollution accumulation in coastal, industrial or desert areas, **Sedicoat[®] is the solution** developed by Sediver that:

- improves pollution performance;
- eliminates the need for washing.

Sedicoat[®] combined advantages

Sediver glass insulator

- Highest purity
- Fail-safe inspection
- Outlasts the service life of the line
- No aging
- Safe live-line work

+

Sediver RTV qualified coating

- Eliminates pollution-related flashover
- Hydrophobicity reduces surface leakage current

Customized industrial process

- Consistent quality
- Protects the environment

=

No more
washing

Sedicoat[®] high performance

Optimum lifetime performance

- Stringent technical specifications
- Industrial process quality control
- Extensive qualification program

20 years of proven in-service performance

- 2+ million insulators in service
- 21 countries including USA & Canada
- Pollution types:
 - Marine pollution
 - Extreme industrial pollution
 - Desert conditions

Sedicoat[®],
the wash-free technology
